Summary:

Self-starting and resourceful Full Stack Developer with military and audit experience. With training in implementing front-end and back-end coding, I am astute and always-learning. On group projects, I brought focus to design for user interactions on websites and databases. My experience helped me understand website functionality, coding for multiple platforms, and meticulously create fully functional code. Experienced in communicating clearly with others, both technical and non-technical team members and promoting drive towards end-user needs.

Technical Skills:

Languages: HTML, CSS, and ES6 Javascript

Applications: Node.js, Express, React, Handlebars

Tools: MySQL, MongoDB, APIs, Testing

Methods: Asynchronous Programming, Pair Programming

Projects:

Modern Mornings - Technologies: JavaScript, CSS, HTML, APIs,

Summary: News and Reddit search site with a flexible SPA UX design for Mobile or PC, using API calls to Gnews.io, quoteblock, and Reddit.

Technical Responsibilities: Set up API call to Gnew.io, styling news cards, and building a display carousel

Professional Responsibilities: Led two in a group project, providing both direction and assessing team skill sets

Daycare CRM - Technologies: JavaScript, PDFKit, AJAX

Summary: CRM system for daycare providers to track family information

Technical Responsibilities: Designed invoice with PDFkit and used javascript to create it dynamically

Professional Responsibilities: Provided overall concept, scope, and determined necessary technologies

Swap - Technologies: React Framework, Bootstrap, Axios

Summary: High quality social media platform for the zero energy swap enthusiast.

Technical Responsibilities: Created the base components, and the functionality of the comments and filter bar.

Professional Responsibilities: Provided leadership, handled role assignments, and short term deadlines.

Professional Experience:
