Summary:

Self-starting and resourceful Full Stack Developer with military and audit experience. With training in implementing front-end and back-end coding, I am astute and always-learning. On group projects, I brought focus to design for user interactions on websites and databases. Understands website functionality and coding for multiple platforms and meticulously creates fully functional code. Experienced in communicating clearly with others, both technical and non-technical team members and promoting drive towards end-user needs.

Technical Skills:

Languages: HTML, CSS, and Javascript

Applications: Node.js, Express, React, Handlebars

Tools: MySQL, MongoDB

Projects:

Project 1 - Modern Mornings - Technologies: JS, CSS, HTML

Summary: News and Reddit search site using API calls to Gnews.io, quoteblock, and Reddit.

Technical Responsibilities: Set up API call to Gnew.io, styling news cards, and building a display carousel

Professional Responsibilities: Led the group project in both direction and assessing team skill sets

Result: Project met goals, carousel was a cool contribution, but limited time for expanding search functionality

Project 2 - Daycare CRM - Technologies: JS, PDFKit

Summary: CRM system for daycare providers to track family information

Technical Responsibilities: Designed invoice with PDFkit and used javascript to create it dynamically

Professional Responsibilities: Provided overall concept, scope, and determined necessary technologies

Result: Goals were a bit high at the start, and had to be scaled back.

Project 3 - Swap - Technologies: React, Bootstrap, Axios

Summary: Social media platform for the zero energy swap enthusiast.

Technical Responsibilities: Created the base components, and the functionality of the comments and filter bar.

Professional Responsibilities: Led pace of the project, handling role assignments, and short term deadlines.

Result: Project came out feeling like what we wanted, minus a favorites feature, due to losing a team member
